CAPSULE COFFEE MACHINE

MODEL: PLA1432

Due to on-going product improvements, specifications and accessories may change without notice. Actual product may differ slightly to that depicted.
IMPORTANT SAFETY INSTRUCTIONS
READ CAREFULLY AND KEEP FOR FUTURE REFERENCE

Carefully read this manual before using this appliance.
Ensure that you know how the appliance functions and how to operate it.
Maintain the appliance in accordance with the instructions to ensure that it functions properly.
Keep this manual with the appliance. If the appliance is to be used by a third party, this
instruction manual must be supplied with it.
The safety instructions do not by themselves eliminate any danger completely and proper accident prevention measures must always be used.
No liability can be accepted for any damage caused by non-compliance with these instructions or any other improper use or mishandling.

Do not use this appliance if it has been dropped or damaged in any way, or if the supply cord is damaged.

INTENDED USE
This appliance is intended to be used in household and similar applications such as
• Staff kitchen areas in shops, offices and other working environments
• Farm houses
• By clients in hotels, motels and other residential type environments
• Bed and breakfast type environments.

This appliance is not suitable for commercial or industrial use. Do not use this appliance for anything other than its intended use.

PACKAGE CONTENTS

1 x Capsule coffee machine
1 x Instruction manual

Confirm all parts before disposing of carton. Safely dispose of all plastic bags and other packaging components. They may be potentially dangerous to children.
GENERAL AND ELECTRICAL SAFETY

Do not use this appliance for any use other than its intended purpose

When using electric appliances always observe safety regulations where applicable to reduce the risk of fire, electric shock and personal injury. Always check that the power supply corresponds to the voltage on the rating plate. Always unplug the appliance when not in use.

Supply Cord and Plug
Always unplug from mains supply when not in use or when filling the tank with water. Do not abuse or damage the power cord. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard. Do not let the supply cord touch hot surfaces.

Children and Infirm Persons
This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children must be supervised to ensure they do not play with the appliance, do not allow children to use the blender without supervision.

Water
Do not immerse appliance in water. Do not immerse any part of this appliance or supply cord in water. Do not use with wet hands or use in damp situations. Always unplug from the mains supply when filling the tank with water.

Earth Safety
This appliance must be earthed. Only connect to a suitably earthed 220-240V~50/60Hz supply socket.

Burns Risk
The temperature of accessible surfaces may be high when the appliance is operating. Do not touch hot surfaces. Boiling water, hot steam, spout and capsule holder can cause serious burns, always take care when using this machine. Do not put steam or hot water towards the body.

Use and Environment
Only use the appliance on a stable, level, heat-resistant surface. Do not use outdoors. Do not use directly below a socket outlet. Do not let the cord hang over the edge of any table or bench top. Do not leave the appliance unattended whilst in operation. Do not use accessories that were not supplied with this product, as this may result in injury.
WARNING: Do not operate this appliance without water. Use only water in this appliance; do not fill with other liquids or foods in the reservoir. Do not operate this appliance without the drip tray and grill in place.
WARNING: Potential injury from misuse

Do not insert fingers into brewing chamber as sharp edges may cause injury.
Damaged or Dropped
Always inspect your appliance before use. Check parts are correctly attached. Do not use this appliance if it has been damaged, dropped, left outdoors or dropped in water. Return it to an authorised service dealer for examination and repair.

CAUTION: DO NOT move the water tank from the machine while operating to avoid water spilling or the system absorbing air in it.
DO NOT insert another capsule within 10 seconds of operation as the hydraulic piston needs to return to original position.

COFFEE CAPSULE INFORMATION

IMPORTANT: Use only Nespresso™ compatible coffee capsules. Other types of capsule may not work successfully with this machine or may cause damage to this appliance that is not covered under warranty.

BEFORE THE FIRST USE
Remove the coffee maker from the package and check the accessories according to the list. Clean all the detachable components according to the following section of “CLEANING AND MAINTENANCE”. Then assemble them completely.

OPERATING INSTRUCTIONS

- Remove the water tank, open the lid and pour in up to 0.7L of water.
- Re-install the water tank in the correct position after filling.
- Plug the power cord into the wall socket.
- Press either cup size button. The button will begin flashing, indicating that the device is starting to heat up.
- When the button stops flashing and remains on, the device is ready to use.

Coffee Capsule
- Open the operating handle, insert the capsule in unit.
- Close the operating handle.
- Place the coffee cup on the tray. (With a small cup, flip down the small cup tray to the horizontal line.)
- Press the selected cup size volume button (Lungo or Espresso).
- The selected cup button will flash while the machine is pouring the coffee.
- When the button stops flashing, the coffee extraction is complete.
- To manually stop the coffee pour, press the flashing button at any time.
- Open the operating handle, the used capsule automatically drops into the capsule container.

Personalised customisation
Factory settings: The small cup volume is approx. 40ml; the large cup volume is approx. 110ml
To change the pre-set cup volume
1. Press the button to start the coffee extraction.
2. Press and hold the cup button after the water starts flowing, after reaching the required volume of the water required release the button. Minimum length is 3 seconds).
3. This level will be automatically stored to that button for the next use. (Note: the maximum extraction time is 1 minute)

Standby/Shutdown pattern
- The machine will enter standby mode when the machine has not being used for more than 5 minutes
- To manually turn off the machine, press the small/large cup buttons at the same time.
CLEANING AND MAINTENANCE
Regular maintenance of your appliance will keep it safe and in proper operational order.

Before Cleaning
When not in use or before cleaning, always disconnect the appliance from the mains supply and allow it to cool completely.

Internal cleaning
After each use to get rid of coffee residue inside, run the machine in normal operation but without a coffee capsule. This allows clean water to run through the machine. Repeat until clear water comes out of the coffee dispenser.

To make sure your Capsule coffee machine operates efficiently, you need to clean away the mineral deposits left every 2-3 months.

1. Fill the tank with water and descaler to the MAX level (Refer to the instructions of descaler for dilution) Please use “household descaler"
2. Run the machine in normal operation but without a coffee capsule.
3. After you have run the descaler through the machine, fill the tank with clean water and run the machine with no capsule on the large cycle.
4. Repeat the process of running with fresh water 4-5 times to make sure the piping is clean.

Before Cleaning housing and parts
When not in use or before cleaning, always disconnect the appliance from the mains supply.

Cleaning
1. Turn off power source and let the coffee maker cool down completely before cleaning.
2. Clean housing of coffee maker with a clean damp cloth often.
   Note: Do not clean with alcohol or solvent cleanser. Never immerse the housing in water for cleaning.
3. Clean all the detachable attachments in water and dry thoroughly.
